DETAILED ACTION

Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 are, drawn to a method for protecting an animal against lethal infection, classified in class 424, subclass 184.1.
 - II. Claims 17-22 are, drawn to a protein composition, classified in class 530, subclass 350.
 - III. Claims 23-27 are, drawn to a DNA composition, classified in class 536, subclass 23.1.
 - IV. Claims ~~28~~^{and 30} are, drawn to a method of inducing immune response, classified in class 424, subclass 190.1.
 - V. Claim 29 is, drawn to a method of administering a composition, classified in class 424, subclass 93.46.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I, IV and V are drawn to different methods. The inventions are shown to be distinct because they are drawn to distinct methods, which differ in method objectives, method steps and material used.

Groups II and III are drawn to structurally and functionally different products. The inventions are shown to be distinct because they are drawn to distinct products, made by different methods and they are physically and functionally distinct molecules.

Inventions III and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the

Art Unit: 1645

product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of group V can be used with other immunogenic compositions such as inactivated bacilli vaccine of anthrax.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Election

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

If applicants elect group I, then there are additional election of species.

Please choose one of the SEQ ID NOs: 2 or 4.

If applicants elect group II, then there are additional election of species.

Please choose one of the SEQ ID NOs: 2 or 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Art Unit: 1645

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
